

# Thes | Thes

## **Thes & Thes by Thes Tziveli: Techno-Emotions for a feasible luxury.**

The message of the Thes & Thes A/W 09-10 Collection is clear: people can still invent everything through a **feasible price**. Foxes, minks and orylogs are converted into fabrics in order to create soft gilets and micro-blouson jackets changed into blue-night, bordeaux-black and silver white colours, just to live an eighties mood.

**Leathers and furs of sublime quality are tooled with a treatment which boasts the best technological innovations** in regard to tanning, manufacturing and finishing, to make furs the outcome of a stout team work, a mix of technology, handicraft and style.

**Foxes and minks seem to be feathers and challenge the force of gravity, with their lightness, through the micro-blouson jackets made of fur.**

The chromatic range is really rich: from silver white to light grey; from blue to golden black; from red to bordeaux; from beige to bronzed brown.

Presentation of the A/W 09-10 Collection: innovative alchemies which draw close foxes, minks and orylogs with fretworks and weaves for micro-blouson jackets.
